

Hà Anh Thảo

FRONTEND DEVELOPER

 0987967077  anhthaodev@gmail.com  <https://portfolio.iuh-mern.id.vn>  Ho Chi Minh city, Viet Nam

SUMMARY

I am a highly driven individual with a strong sense of responsibility and excellent logical thinking skills. Passionate about learning and personal growth, I am dedicated to improving my abilities through practical experience. My aim is to consistently develop myself and deliver meaningful contributions to the company.

OBJECTIVE

Short-term: Utilize and enhance my skills in Next, Express, Nest, and other technologies by applying them to real-world projects. Actively participate in the development team and ensure the successful completion of assigned tasks.

Long-term: Aspire to become a proficient Fullstack Developer capable of working independently and contributing to the creation of high-quality web applications. Aim to deepen my expertise in UI/UX design and website performance optimization.

EDUCATION

Industrial University of Ho Chi Minh City	2020 - 2024
Software Engineering	
GPA: 3.6/4.0	

WORK EXPERIENCE

CÔNG TY TNHH CÔNG NGHỆ VÀ DỊCH VỤ BEONE	07/2024 - 02/2025
Fullstack Developer	
Interface design and business processing for DMS system at frontend using React, GraphQL and Ant design.	
Add delivery functionality to TMS system using Nest, React native and PostgreSQL.	

CERTIFICATIONS

TOEIC 565	2024

HONORS & AWARDS

SCHOLARSHIP AT IUH	2020-2024
--------------------	-----------

SKILLS

Frontend	React, Next, React Native, Redux, TailwindCSS, Bootstrap, shadcn ui, MUI, JQuery, Figma, Typescript, Responsive, Design, JavaScript
Backend	Node, Express, Nest, JWT, Socket.IO, MongoDB, SQLServer, MySQL, Postgresql, MariaDB, Prisma, Redis, Qdrant
Other	BASIC, Version Control: Git, Docker, Docker Compose, AWS, Firebase, Postman, Selenium, Heroku, Netlify, Vercel, Implement, Gemini LLM, OpenAI LLM, Elasticsearch, Github Actions, Infura, RabbitMQ, VPS
Soft skills	Teamwork, Communication, Problem Solving, Self-study, Easily Adaptable, Collaborate, Implement, Issues, Best Practices

PROJECTS

SmartRent

(Jul 2024 - Dec 2024)

Description project	House rental system using Blockchain, Smart contract, real estate suggestion using chatbot and payment by ETH.
Your team size	2
Website	https://smart-rent.iuh-mern.id.vn
Source code	https://github.com/thaoanhhaa1/SmartRent
Technologies	Node, Express, Python, FastAPI, Elasticsearch, Redis, Blockchain, Smart Contract, Web3, Next, Ant Design, Goong Maps, Zustand, Metamask
Responsibilities	Developed front-end interfaces using Next and Typescript Backend integration using microservice architecture and communicating with each other via RabbitMQ between service Nodes and Python Use github actions to automatically deploy the system to render, vps and vercel

Social Media

(May 11 - Jun 10)

Description project	Register a new account and log in to update their profile. Share posts, images, and videos and interact with other people's content through likes and comments. Follow or unfollow others and receive notifications of new likes, comments and followers as well as birthday reminders. Additionally, the system can analyze trends based on users' posts
Your team size	1
Website	https://redux-social-media-front-end.vercel.app
Source code	https://github.com/thaoanhhaa1/redux-social-media
Technologies	NodeJS, ExpressJS, JWT, Socket.IO, Swagger, MongoDB. Typescript, React, Redux, TailwindCSS. Firebase, Koyeb, Vercel, Docker, Github actions
Responsibilities	<ul style="list-style-type: none">Developed front-end interfaces using React.jsIntegrated back-end services and APIs using Node.js and MongoDBBuild image, deployed the application to Koyeb and Vercel

Chat App

(Jan 9 - May 25)

Description project	Register, log in and authenticate with OTP. Manage friends, manage groups, chat 1-1 and group chat. Some advanced chat features such as: location, sticker, emoji, images, videos, files, preview file, link, call,...
Your team size	3
Website	https://lola.iuh-mern.id.vn
Source code	BE: https://github.com/Vu14082002/chat-app-cnm-be FE: https://github.com/thaoanhhaa1/ChatApp-CNM-web
Technologies	React, Node, ExpressJS, MongoDB, Google Map API, I18next, S3 (AWS), JWT
Responsibilities	<ul style="list-style-type: none">Developed front-end interfaces using React.jsIntegrated back-end services and APIs using Node.js and MongoDBDeployed the application to Koyeb for backend and vercel for frontend
